The Russian Frigate General Admiral. OMPLETION OF HEE COFFERING ON THE BALANCE DOCK—THE VESSEL ABOUT TO BE FLOATED OFF— DESCRIPTION OF THE GREAT DOCK, RTC.

The immense wooden war ship General Admiral, which vas lately built and launched by Wm. H. Webb, Esq., for the Russian government, was taken up on the large Balance Dock, foot of Pike street, East river, on Friday, the 12th inst., for the purpose of being coppered. This work is now completed, and is on a scale of magnitude commensurate with the other solid proportions of the frigate. The copper used is that known as the cold rolled description, and the value of the raw material may be taken at \$14,000. There were 5,150 sheets of copper, weighing about 50,000 pounds, placed on the vessel, each sheet requiring as many as 140 nails to secure it, so that 721,000 nails, weighing 5,000 pounds, have been used in

the coppering alone of the great northern leviathan.

The General Admiral will be floated off the dock this morning. The operation of lowering her will be comcupy about one hour, during which time the frigate will present a beautiful appearance, the copper ruaning up to a draft of twenty-three feet, and looking like a polished

The great balance dock referred to above is the largest of the kind in the world, and its capacity for receiving vessels of immense size renders it one of the most useful mechanical institutions in the United States. Steamships and sailing vessels of all sizes, arriving at this port da maged in every conceivable manner by storms and heavy seas, have been taken up and repaired on this dock, with most wonderful rapidity. As an instance, it may be mentioned that some time ago a ship was taken out of the water in the morning, her sheathing torn off, new copper put on and the vessel returned to her dock in the North river the same evening. The frigate General Admiral weighed 3,680 tons, and was taken on the dock in the space of one hour and thirty minutes. The lifting power of the dock is 3,000 tons, and is worked by two steam engines of 100 horse power each, setting in motion fourteen pumps, each forty inches in diameter and five feet stroke. The dimensions of the dock are as follows:—Length, 325 feet; breadth, 100 feet; depth, from top to bottom, forty feet. The dock is made in fourteen compartments, to each of which is attached one of the pumps mentioned above. Docks of this descrip tion are now in operation at Havre and Marseilles, and at two or three other places on the continent of Europe, and the Austrian government is having one built near Trieste, equal in dimensions to the great dock at New York, of which we have now written.

KNOW NOTHING CONVENTION—NO NOMINATION FOR COMPTROLLER AND GOVERNOR OF THE ALMS-

HOUSE—EXCITING TIMES.

The Know Nothing Convention met last evening in the american General Committee Rooms, corner of Broadway and Lispenard street, to nominate candidates for Comp troller and Governor of the Almshouse.

At half past seven o'clock the Convention was called t

order, and Mr. Henry Snyder was elected Chairman, and Mr. Gilbert Graham, Secretary.

The Chair appointed the following gentlemen a Com-

Mr. Gilbert Graham, Secretary.

The Chair appointed the following gentlemen a Committee on Credentials:—Messrs. N. S. Husted, P. J. Monroe, Joseph Toone, Robert Beatty and J. K. Mack.

The credentials of the delegates from the Thirteenth and Fourteenth wards being contested, it was moved and adopted that one person of each delegation of contestants be admitted to the Convention for the purpose of stating their grievances, and five minutes be allowed each delegate for that purpose. Messrs. Thater, Floyd, Briggs and Reed, of the Thirteenth ward, having been heard, and each setting forth that the President of the Council of that ward would not call a regular meeting to elect the delegates for the Convention, each party had, therefore, taken measures to elect delegates, and were there to await the decision of the Convention. One of the representatives said the Secretary of the Council had gone to Canada, and the President had gone over to the enemy (the democracy). He very charitably concluded that the whole affair should have been "blown up" a year ago.

The Fourteenth ward contesting delegates were then admitted to state their grievances. Messrs. Leadmark and Copeland were heard. Mr. L. stated that it was not a contention between "the old or superseding council," but a contest about delegates representing the ward who do not reside in it. Mr. C. was surprised that there was any contest of the delegation that he represented. He was vice-President of the Council, and had instructed the Secretary to call a council, which was attended to, and a meeting heid, and the delegation regularly elected. Mr. C. showed considerable pluck, and in answer to numerous inquirers would satisfy nobody on the place of his residence. His Council on the delegation to the Convention had nothing to do with it. This work against the grain of the Convention; nevertheless Mr. Copeland stuck to it. It was then agreed that the coutesting delegations then present in the ante-room elect a delegation to the Convention be published, to afford the

and adopted that the whole subject of the Fourteenth ward be laid on the table.

The present officers of the Convention were continued as the permanent organization.

The Convention at a quarter to ten o'clock entered upon its regular business, and for the office of Comptroller the following gentlemen were named by the delegates:—Messrs. G. W. Morton, R. T. Haws, Luther Bradish, W. F. Havemeyer, S. B. Ruggles and Isaac O. Barker. An informal ballot was then taken, and the following result announced:—R. T. Haws, 16; Luther Bradish, 21; L. O. Barker, 3; S. B. Buggles, 4; G. W. Morton, 20.—Total, 64. The Third and Fourteenth wards not being represented in the above total, it was evident that four begus votes had been cast.

An open nomination for Governor of the Almshouse resulted in the mention of the following names:—Frederick G. Wagner, W. Bininger, Dr. Forrester, Stephen H. Branch and Robt. Beatty. A formal ballow was objected to by a member on the ground that before another meeting could take place for the nomination of Comptroller it was not improbable that the republicans would tamper with the members of the Convention, and willingly consent to go with the American Governor of the Almshouse if the American Governor of the Almshouse if the American would go with them on their candidate for Comptroller.

A good deal of contention ensued. A division was taken

roller.

A good deal of contention ensued. A division was taken on the subject of a formal bailot, and decided—27 affirmatively, 28 negatively; whereupon, the Convention adjourned till Wednesday evening, at a place to be designated through the newspapers.

The Convention was very lively, and the brethren not convention to the convention of the convention of the convention.

the proprietor and editors of the Courrier des Rigis Unis had been left in the advertising columns of the HERALD had been left in the advertising columns of the Herand-none of the three gentlemen whom he tries to insult would have taken the trouble of invoking the right of answer in your paper. But since it has pleased you, in an editorial article, to endorse as creditable his sayings, I, for one, re-quest you to publish simply my absolute and flat denial to all and each of his allegations, which I pronounce a ma-terial and unqualified falsehood.

The story of the supposed soirces is altogether a poor in-vention, without the shadow of a pretext. About the al-leged insults to Miss Piccolomini, my articles are in print, everybody can read them; and I dely the most fastidious admirer of that young artist to find in them one single word objectionable.
